PRATHAMESH PATIL 16D110012
Metallurgical Engineering and Material Science UG Third Year
Indian Institute of Technology Bombay DOB : 27/05/1998

Examination	University	Institute	Year	Score
Graduation	IIT Bombay	IIT Bombay	2021	6.54
Intermediate/+2	MSBSHSE	SP College, Pune	2016	78
Matriculation	MSBSHSE	Sinhagad Spring Dale School, Pune	2014	90

Currently pursuing a **Bachelors degree** in Metallurgical Engineering and Material Science with a **Masters degree** in Ceramics and Composites as part of dual degree program at IIT Bombay

CONTACT DETAILS

ACADEMIC ACHIEVEMENTS

- Secured **AIR 3248** in IIT JEE Advance among 0.2 Million candidates (2016)
- **99.6 percentile** in JEE Mains among 1.2 Million people (2016)
- In **top 1 percentile** in the state wise conducted National Standard Exam in Chemistry (2015)
- **Won** Prof. Brahm Prakash memorial materials quiz organized by IIM, Pune Chapter (2015)
- Represented the Pune chapter and **Semi Finalist** in Prof. Brahm Prakash memorial **materials quiz** conducted by Indian Institute of Metals, Kalpakkam (2015)
- Scored the highest grade **10/10** in Transport Phenomenon, Experimental Techniques in Materials Science and Electronics and Machines Laboratory. (2018)
- Completed **80 hours** of social work under National Service Scheme. (2018)

PROJECTS UNDERTAKEN

- **Synthesis and characterization of thermoelectric materials** *(May to Nov 2018)*
  - Analyzed the commercially available industrial grade Mn-Si and Fe-Si powders
  - Worked on commercialization and utilization of the same in thermoelectric generators
  - Worked on measurement systems like DSC, Thermal diffusivity measurement, Seebeck Measurement, Electrical conductivity measurement, XRD, ICP-AES, SEM
  - Measured thermoelectric properties of pellets prepared from powders
- **Analysis of different geometries for Thermoelectric generators** *(Sept 2018 to present)*
  - Working on thermoelectric efficiency of two different geometries for Thermoelectric generator
  - Measuring TE properties like thermal and electrical conductivity, Seebeck coefficient
  - Simulating thermoelectric phenomenon in COMSOL multiphysics and comparing with results
  - Analyzing factors for scalability like strength, formation and properties of contact
- **Characterization of an Eggshell (course project)**
  - Used tools like SEM, XRD, FTIR to test an egg shell for certain properties
  - Analyzed the data we got from all instruments and interpreted it to get sensible results
  - Correlated the results we got with physical and chemical properties

COURSES UNDERTAKEN

Core Courses	Practical and other courses
• Structure of Materials • Thermodynamics of Materials • Data analysis and Interpretation • Materials and Technology • Mechanics of Materials • Transport Phenomena • Colloids and Interfacial Science • Phase Transformations • Mechanical Behavior of materials • Kinetics of Processes • Experimental techniques in materials science	• Experimental and Measurement Lab • Introduction to Electrical and electronic circuits • Computer programming and Utilization • Engineering Drawing and Graphics • Metallography and Structural Characterization • Computation Lab • Electronics and Machines Lab • Economics • Introduction to Sociology

Additional Courses (sit through/out of interest)

- **Thermoelectric Materials**
  - Thermoelectric Effects : **Seebeck** and Peltier Effects
  - **Semiconductor Physics** : Conduction processes, energy spectrum, transport equations, charge carriers and phonon scattering, Drude model, Sommerfeld Model
  - Direct and indirect **Measurement** of thermoelectric properties.
  - Choosing and optimizing materials :**Thermoelectric Systems** and applications.
  - **Modeling** of thermoelectric transport using **MATLAB**

SKILLS

- **Programming Skills**: C++, MATLAB and/or GNU Octave, HTML
- **Software Skills :** MATLAB, Octave, COMSOL, Wolfram Mathematica, Stellarium, AutoCAD, SolidWorks, Origin, MS: Word, Excel, Powerpoint, Adobe Premier Pro.
- **Languages known :** English, German, Hindi, Marathi.

POSITIONS OF RESPONSIBILITY HELD

- **Convener at Materials Club, IIT Bombay**
  - Created awareness about Material Science in the student community
  - Kept posting about a new material or a phenomenon related to material science
  - Circulated projects for undergraduates to get them interested in material science
  - Created a platform for people interested in Material Science to discuss about it

- **Volunteer at Astronomy Club, IIT Bombay**
  - Mentored newcomers to the club and taught them to use various concepts in Astronomy
  - Conducted overnight sky gazing sessions focused on constellations and Messier objects in the night sky which entertained around 100 people every time

EXTRA CURRICULAR ACIVITIES

- Playing sports: represented school and college in sports like Football, Volleyball, Hockey
- Doing Astronomical Observations. Have completed a half Messier Marathon
- Reading books on fictional and non fictional themes, reading and writing poetry
